**3:1 High speed (-3dB bandwidth 1.8GHz) Switch with Mobile High-Definition Link (MHL)**

## **Descriptions**

The WAS4731Q is a bi-directional, low power, high-speed 3:1 switch that operates from a single +2.3V to +5.5V power supply.

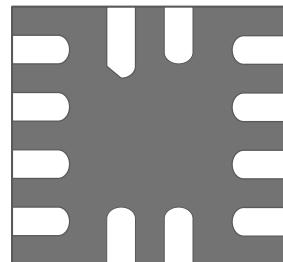

The WAS4731Q is designed for switching of high-speed (-3dB bandwidth 1.8GHz) signals in handset and consumer applications, such as cell phones, digital cameras, and notebooks with hubs or controllers with limited USB I/Os.

The WAS4731Q has low bit-to-bit skew and high channel-to-channel noise isolation, and is compatible with various standards, such as high-speed USB 2.0 (480Mbps), MHL 1080p/60fps. Each switch is bi-directional and offers little attenuation of the high-speed signals at the outputs. Its bandwidth is quite marginal to pass high-speed differential signals (3.6Gbps) with good signal integrity.

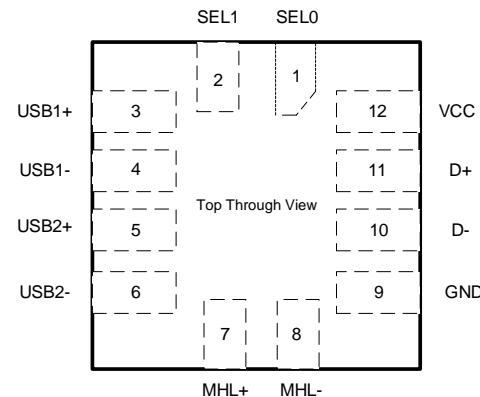

The WAS4731Q is available in QFN1818-12L package. Standard products are Pb-Free and halogen-Free.
